Segmentation Test Image 1

This is a test of SLA page segmentation for 2 classes, {contone and other}. This should successfully distinguish color and grayscale contones from spot color patches and text areas. Therefore this target contains at least one example of each of these events. Blah blah blah blah blah blah blah. Therefore this target contains at least one example of each of these events. Blah blah blah blah blah.

This is a test of SLA page segmentation for 2 classes, {contone and other}. This should successfully distinguish color and grayscale contones from spot color patches and text areas. Therefore this target contains at least one example of each of these events. Blah blah blah blah blah blah blah. Therefore this target contains at least one example of each of these events. Blah blah blah blah blah. This is a test of SLA page segmentation for 2 classes, {contone and other}. This should successfully distinguish color and grayscale contones from spot color patches and text areas. Therefore this target contains at least one example of each of these events.

Segmentation Test Image 8

This is an example of a segmentation test image. It shows a grayscale image of a landscape with a road and trees. The image is segmented into regions of different colors and textures. The regions are labeled with numbers 1 through 10. The regions are: 1. Road, 2. Trees, 3. Sky, 4. Grass, 5. Water, 6. Rocks, 7. Fences, 8. Buildings, 9. Power lines, 10. Other.
